Glenwood Springs Water Treatment Plant Currently Experiencing Issue

GLENWOOD SPRINGS, CO – The City of Glenwood Springs water treatment plant is currently experiencing an issue, having lost the raw water supply. The cause is still being determined. Finished water is at critically low levels, which may lead to low water pressure or a temporary shut-off. We sincerely apologize for any inconvenience this may cause. Water treatment plant staff are working to resolve this problem as quickly as possible. The City of Glenwood Springs will send updated information as it becomes available.
